as well as Microsoft Excel. In April 2010 Autodesk announced a major new design for AutoCAD Activation Code, and the release of AutoCAD Serial Key 2010. AutoCAD 2010's key features were a redesigned user interface, a richer PDF interface, and collaboration tools. AutoCAD has a limited scripting language, "AutoLISP". AutoLISP is based on Java and supports most of its features such as functions, loops, and user defined classes. Also, AutoCAD can be integrated to Microsoft Office applications via Microsoft Office integration add-in, e.g. ArclInfo Workstation add-in, SDE Explorer add-in or Office 365. With the introduction of AutoCAD 2010, all older versions were moved to a new numbering system (AutoCAD releases ending with a 4, and AutoCAD 2006 ending with a 9). In September 2011, Autodesk acquired Acusign Technologies. In June 2016, Autodesk acquired Onshape, Inc. in a \$40 million deal.
